About **tvover.net**

In the last few years, IPTV has become a buzzword in the high-tech industry that tops headlines daily. Well-established research and consulting companies project a tremendous growth of IPTV subscribers as well as subscriber revenue for the next five years.

tvover.net is a leading site covering news, analysis, information and opinions about IPTV, Internet TV, online video and related topics. Site content is organized into categories, such as reports, events, regulation, service providers, set-top boxes, provider hardware and software to name a few.

Since 2005, **tvover.net** has been filtering through the latest headlines and company news to provide the top stories in a high-impact online format. RSS, ATOM feeds and a daily newsletter compliment the online format to provide readers with a variety of methods to receive the latest headlines.

To round out the offering, **tvover.net** provides the most detailed directory and guide of video sites on the Internet with over 1400 available from over 50 countries.
